

TECHNICAL DATASHEET

JETPRO 160 / REF.30815

ATOMIZER

JETPRO 160 is a powerful machine for applying thin films of filler.

It uses a valveless pump, is easy to maintain, with a squared stainless steel tank for easy cleaning, a Ø35 mm drain valve. It is equipped with large diameter, flat profile, inflatable tyres for better stability.

The machine is equipped with a ball nose pump with integrated filter. Starting is wireless when the gun is opened.

The quick-release hoses make it easier to use on site.

APPLICATIONS

All types of ready-to-use film plasters: smoothing coating, raking coating, casing coating, bituminous coating ...

Can also make droplet type applications with an optional kit and a compressor.

Maximum working pressure	140 bar
Maximum product flow-rate	10 L/min
Electric motor	4 kW
Power	400 V / 50 and 60 Hz
Type of pump	volumetric screw
Pump	JET 4
Tank capacity	160 L
Maximum tip size (new)	0,055"
Dimensions (L x w x h)	160 x 80 x 89 cm
Weight	171 kg
Noise level	91 Lwa

DELIVERED WITH

- a Ø19 x 40 m hose
- a Ø16 x 5 m hose
- a spray-gun with tip holder
- a Standard 627 tip
- a toolbox containing:
 - two spanners 17 and 22
 - a multigrip plier
 - three Allen keys Ø2, 5 and 8
 - two cleaning balls and a cleaning brush
 - 1 L of storage liquid
